

HERU PURNAMA

Bandung | herupurnama.com | herupurnama.work@gmail.com | linkedin.com/in/heru-purnama/

Dedicated IT Specialist with a passion for troubleshooting and resolving technical issues. Skilled in maintaining hardware and software systems to ensure optimal performance and user satisfaction. Aspiring Network Engineer with a passion for networking concepts and protocols, build and maintain reliable network infrastructure. Junior Full Stack Developer with a foundation in web development and a desire to expand skills in front-end and back-end technologies. Excited to contribute to the creation of innovative and user-friendly web and Internet of Things applications.

EDUCATION

Universitas Pendidikan Indonesia- Electrical Engineering - Actively participating in the Kampus Merdeka program. - Engaged in server management for ee.upi.edu, involving routers, switches, firewalls, NAT, and port forwarding, Proxmox. - Assisting friends with projects: IoT projects, graph, parking system with db, API, MQTT, SIM800L Telegram. - Developed a website to provide easy access to the TOPSIS algorithm, using Flask and Python. - Engaging in off-campus activities by enrolling in various online courses and webinars. - Proficient in operating AutoCAD, SketchUp, and Blender for building and electrical drawings.	2019 – 2023
SMKN 5 Bandung- Computer and Network Engineering - Actively involved in IT Club organization. - Experienced in various school projects involving configuration of MikroTik routers, 3D modeling using Blender, game development in Unity, creating virtual lab environments using Linux, and developing basic CRUD systems using PHP CodeIgniter.	2016 – 2019

ACTIVITIES AND EXPERIENCE

Network and System Engineer Teradata Megah - Virtualization using VMware for creating and managing virtual environments. - Load Balancing using Nginx and Citrix to distribute and optimize traffic. - MySQL with master-slave synchronous replication to a DRC for high availability and data protection. - IPsec and OpenVPN tunnels for secure site-to-site communication, along with Policy-Based Routing (PBR), Network Address Translation (NAT), and Border Gateway Protocol (BGP). - Transparent web proxy and content filtering to manage and secure web traffic. - Network Devices Checkpoint, Mikrotik, and Aruba in network security, routing, and wireless connectivity. - Extended Detection Response: XDR Bitdefender, EDR Eset. - OWASP ZAP, Burpsuite, Postman, Wireshark, Python Automation.	Bandung June 2024 - Present
Network Engineer Mastersystem - Manage VLANs and Trunking systems to enable segmented communication. - Configure EtherChannel LACP/PAGP for link aggregation to maximize bandwidth utilization. - Implement (rapid) spanning tree and port fast for loop prevention. - Optimize wireless channels to avoid overlapping frequencies. - Manage routing to enable communication across different IP classes using OSPF, EIGRP, RIP and provide DHCP for automated IP address assignment (works with tunnel). - Implement tunneling using GRE IP Cisco. - Implement ACL to provide rules and NAT. - Configure HSRP as redundancy method to preserve more links. - Familiar with F5, pools, load balancing, virtual server, HA, config sync, NAT, persistence profile, irules.	Jakarta, Indonesia Feb 2024 - May 2024
Scalable Web Service With GoLang Kominfo Hacktiv8 - Developing code to import data from Excel, creating a REST API, and designing a minimal web game similar to Fallout Shelter. - Creating MyGram API, which includes user management (login and register), photo uploads, commenting functionality, and social media interactions (post, get, put, delete) related to userIDs, and deploying it to Railway.	Hacktiv8 Feb 19 2024 - Mar 25 2024
Artificial Intelligence Mastery Program Orbit Future Academy - Employing Git version control for collaborative programming efforts. - Implement a chatbot with NLP to offer YouTube recommendations based on user queries. - Utilizing Computer Vision to categorize phone screen conditions, ranging from minor to severe damages. - Deploy a website featuring NLP, CV, Google API, CRUD, authentication, and a profile system on both Heroku and a private server.	Jakarta, Indonesia Feb 22 2022 - Jul 22 2022
Computer Network Engineer & IT Helpdesk DitSTI ITB - Offer client services, including hardware upgrades and repairs (primarily laptops), installing, licensing, and repairing software to various operating systems. - LAN installation in new building and made perfect server with Control Panel using ISPConfig.	Bandung, Indonesia Jul 02 2018 – Sep 28 2018

ACHIEVEMENT AND CERTIFICATION

Information and Communication Technology (ICT) - Mikrotik: MTCNA – Jan 2019 - Cisco: Network Automation Engineering Fundamentals Specialization, Endpoints and Systems (Coursera)- March 2024 - Cisco CyberOps Associate (CCOA) - May 2024 - JavaScript Beginner (Udemy and Skilvul)- March 2024	- Basic (Python, SQL), Intermediate (SQL) HackerRank- Feb 2024 - Pure Storage Field Engineer, FlashBlade and FlashArray
	English Course - ETS TOEIC score 570- Feb 2019 - Centralcourse TOEFL score 553- Sep 2023

SKILLS

- HTML, CSS, Python (Flask, Django), C++, JAVA, GoLang, JavaScript (Node JS, Express).
- Hardware Installation, Application installations, Help Desk Operations, Desktop Technical Support, User Training, Virtualization Technologies, Network Troubleshooting, Network Maintenance, Server Maintenance, Wireless Networking, Computer Diagnostics, Wireshark, Kibana, DDoS.
